```

Pred. No. is the number of results predicted by chance to have a

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

The CDNA was made by using Uniabed Oligo-dT priming (Bynal). PCR based library using a modified protocol from the SMART PCR cDNA UNG Stress of EAMP1. Demanded into the UNG sites of PAMP1. Uneatodes were provided by Dr. Mark Viney of Bristol, UK."
